Historic Boot Lake Update

Gary Doroff has contacted Haas Printing in Park Rapids for a quote.

Boat Landing

The boat landing has been inspected and signage has been repaired and a new Power Loading Guidelines sign has been added to the board. (Since this meeting they have re-graded, removed a fallen tree, added 1 more 5'x12' precast to extend the landing and brought in new gravel for the road). Thanks so much to Gary Doroff for managing this project.

AIS Inspector:

Fred Luckeroth contacted Karl Koenig at the AIS office and there will be an inspector at the public access on Fridays this summer. No other details as to additional weekend coverage.

Secchi Disk Reading

Reading earlier this year was at 30 feet which is a much improved number from readings last summer. Fred and Chris Luckeroth have been gathering this information on lake clarity for years and we thank them for the great job they are doing this!

Loon Nests:

Fred Luckeroth nest on north end of lake had pair nesting and 2 very young baby loons have now been sighted with that "couple".

Gary Doroff nest not visible at this time so he will check on that although there has been a sighting of a pair nesting in a bay near the middle of the west side of the lake so they may be the previous pair from across the lake.

Craig Nieman nest does not have any loons there at this time.

Meeting adjourned at 7:30 p.m.

Respectively submitted,

Kathi Doroff - Secretary
